ID 1100017006

## GENERAL INDUSTRY | HP deburring

ASP «High Tech» covers are made from technical fabrics coated on both sides. This ensures excellent resistance to high-pressure stripping or washing processes and enables the covers to last several years. While meeting your constraints, the «tailor-made» designs ensure maximum efficiency without limiting robot movements. The optional dry air ventilation/pressurization system optimizes protection results.

## TORCAL B+

Polyamid texture | Two sides coated with a thermoplastic Blue colour on external side

Guaranteed silicon free

Waterproof

Double side coating

ATEX painting

Waterproof with welded seams

Washable

Repairable

Ripstop

REACH compliant

RoHS 2
