

## GENERAL INDUSTRY

### HP deburring Window solution

TPSN

An original solution for the first booths  
Adapts to suit all robot cycles  
Length ajustement during the first cycle  
**Patented solution**

Waterproof  
with welded seams

Management System  
ISO 9001:2015  
[www.tuv.com](http://www.tuv.com)  
ID 1100017006

## GENERAL INDUSTRY | HP deburring - **Window solution**

The solution does away with the necessity of developing window type covers. Thanks to its patented «bellows» principle, the cover adjusts to suit the robot cycles right from the initial trajectory. This means that the cover is free of water pockets and is never under tension. Used in association with fabrics that have shown their considerable flexibility of use; the window solution provided by ASP has become a standard reference in High Pressure cleaning processes.

## TPSN

Polyester texture | Coated with black rubber on two faces

Guaranteed silicon free

Waterproof

Double side coating

Waterproof with welded seams

Washable

Repairable

REACH compatible

RoHS 2
